

Lead Carpenter & Construction Foreman – Traveling

Vertical Solutions is looking for foremen to manage projects and skilled production workers for our wood work shop. If you are a seasoned and skilled carpentry professional worker, with high levels of accountability, autonomy, and problem solving experience, along with the desire to travel, then this could be exactly what you've been searching for.

Quick overview:

Responsibilities:

- Initiate, develop, and maintain strong relationships with other Management, Foreman, Carpenters, Production Workers, Welders, and Production Laborers.
- Carry out indoor rock climbing wall construction using a variety of methods, including concrete/structural footers, steel fabrication, rough and fine/finish carpentry, paint, and epoxy coating
- Must have macro view of the project during construction, coordinating with other sub-contractors, and lead small teams
- Send daily progress reports on scope of project, communication with customers, and communicate arising problems
- Knowledge of construction codes, permitting process, and must be able to read plans and learn 3D modeling programs

Qualifications:

- Self-motivated with the ability to operate without constant supervision, and solve problems on your own when needed
- Ability to travel 45 weeks a year
- High level of accountability and ability to effectively prioritize tasks
- Strong time management skills with the ability to work independently and across different trades
- Strong customer service skills
- Adjust to changing assignments while working onsite

What we are looking for from you:

Our ideal fit would be someone with at least five years of on-the-job construction experience in skilled wood work, rough carpentry, finish carpentry, and light structural steel, as well as time spent managing small teams of production laborers/workers. Most shifts are M-F between 7a to 6p and averaging 50 hours per week, but the ability to work weekends with overtime is crucial for this position. Most of our projects last between two-and four-months, with time-off during and in-between jobs. It is also imperative for this candidate to have the ability to work in a physically demanding environment including lifting heavy materials, safely and efficiently working at heights (on scissor lifts, boom lifts etc), and staying on their feet most of the day.

What we provide you as an employer:

Vertical Solutions is the nation's leading climbing wall design and manufacturing company. We're not only looking for the most skilled and intelligent carpenters, but also those with long-term employment potential that can grow the business. We have a serious commitment to the right person who fills this role. This is a true career path position, with the potential to grow into a role that could earn near or above six figures annually within the next 3-years. Most projects are in major cities, so this job is a great way to make money working on challenging projects, while traveling to different parts of the US. Housing is provided in comfortable and nice Airbnbs. Motels and hotels are only used for very short term needs, as quality of life is extremely important to our company culture. Although extended personal time is supported and encouraged, we have no shortage of work for capable people. You will need to provide basic hand tools and a toolbox but we will provide other top of the line tools (Hilti, Festool, Fein).

Our culture:

Most of our business is composed of outdoor enthusiasts, including climbers, mountain bikers, river rats, etc, that choose to take time off between jobs to travel and recreate. We absolutely encourage this lifestyle but this is a position that comes with high expectations and equal amounts of opportunity. Efficiency and productivity are our main priorities as a team, not just as individuals, so we expect our employees to lead by example. We expect you to make the most of your time here at work, as well as in your own personal lives! To apply, send us your resume to employment@verticalsolns.com.
